4mm Allen wrench
(included)

Power Supply

Additional Tools

Level

Tape measure

⚠ Attention ⚠

Assembly is very simple and can be done by (1) person,
However, we recommend (2) people for this assembly.

1

Connect the **27" Panel** to the **Connecting Post** using **(2) Outer Corner Brackets** and **(4) 20mm Furniture Bolts**.

2

Connect the **39" Panel** to the **27" Panel** using **(6) 20mm Furniture Bolts** and **(2) Inner Corner Brackets**.

3

Connect a second **39" Panel** to the first using **(4) 3" Connecting Brackets** and **(8) 20mm Furniture Bolts**.

4

Repeat Step 1 to connect the **27" Panel** to the **Connecting Post**. Then, connect the second **27" Panel** to the **39" Panel**. You will need to use **(2) Outer Corner Brackets**, **(2) Inner Corner Brackets** and **(10) 20mm Furniture Bolts**.

5

Connect both **End Panels** to the **27" Panels** using **(8) 2.5" Connecting Brackets** and **(16) 20mm Furniture Bolts**.

6

Use a **Level** to make sure that all of the panels are set up properly. If you need to adjust the height, turn the **Gliders** at the bottom of each panel.

7

Connect the Male end of the provided **Power Supply** to the Female end of the pre-installed wire on the **End Panel**. Connect the **Power Supply** to the outlet to power on the LED Lights

Refer to the diagram Below:

(Not Drawn To Scale)

8

Your new cubicle is now ready for use.
